The party is sent to retrieve the soul of Prince Rensiek, which has been located in a hidden underground complex, accessible from the sewers. A devourer holds the soul and while trying to come back to this plane to get a more powerful soul, became trapped underground. Although the devourer cannot currently pass through the portal that separates him from escaping, he has set up some defenses underground in the hopes of being a more powerful soul that he can consume and possibly enable traveling through the portal. It is not known that a devourer holds the Prince's soul. It is only known that it is somehow trapped, making resurrection impossible.

A long passage leads from the sewers, eventually transitioning into a cobblestone corridor that ends in a short stairway leading into a "T."

This was a game that really caught my attention and I had high hopes for. A nice break from a near endless amount of VR wave shooters, and poor excuses for games aka "experiences".

Its an oddball world, with different elements, you dont know what to expect from one scene to the next. This should have been a breathe of fresh air for me, and if not for the bugs, it would have made an appearance on my personal top 20 VR games.

But bugs are lurking around every corner. If the game was in EA I could at least have gone in with my eyes open and just hold out hope they would get patched eventually. And its not like I am trying to summon devs back from the dead on an ancient game, this is a 2018 full release title and my thread on my bugs made nearly a week ago

<https://steamcommunity.com/app/776040/discussions/1/1696044439574055049/> has gone unanswered. Not even a vague "we will look into it".

[It pains me to rate it down, as this is the type of game that I would want to encourage. But when the bugs get so bad I cannot progress \(character appears to have no controls \(ie hands\), can pass through solid objects, cannot interact with items or enemies in the world\), I feel I should warn others. \\*My system is more than capable of running the game and my setup doesnt encounter these problems in other games.](#)

[I made the mistake of giving it time as it was newly released when I purchased it 4 weeks ago, my refund request was denied. Despite game breaking bugs and no support, Steam CS doesnt believe this warrants a refund!](#)

**[\\*UPDATE\\* 23Apr](#)**

**[After being denied a refund, I tried fiddling with my setup and trying the game again. Honestly I spent more time trying to get this thing to work than I did play it at this point. And somehow things are getting worse :S](#)**

**[Today:](#)**

[Area I cannot get passed isnt even bothering to load in properly at this point! Its coming up to 2 weeks since I posted my problems without any word at all from the devs. Seriously this isnt refund worthy?!](#)

**[\\*UPDATE\\* 25Apr](#)**

**[Devs reached out. Gave reason for no response as they were on a break. Said they would look into the issues raised.. Did they say HD graphics or HD rip off ??, very good game, it has very good pvp system , it has hundrends of items .. It is a nice but not too long of a game. In the style of "Druids". Make sure you save often and remember you have a finite inventory selection. There are plenty of fun puzzles and some good action and lots of reloading.](#)**

Good Luck destroying the demon best use the +5 Axe it is the best.. The movement in this game is very interesting. However as described there is no true online functionality as of now. Would be great if the developer was able to support this one day. Finished the game. Didn't crash once. Idk if those old reviews are relevant. Fun combat. Nice Art. Happy-go-lucky feel.

Could use more:

Class progression, some polish.

But:

I got this game for 3 dollars and its amazing for 3 dollars. Really ♥♥♥♥♥ Tower Defense game

this is everything the community doesn't want vr to become

(You can get a better mobile td game). Took me a while to get a grip on the game mechanic, but with a solid tutorial that shows you what to do and how to do it, its a game i would happily play again.

The game is great to play with friends, family, or the occasional stranger!

Would be willing to pay for a higher price if there was more content however, such as:

-Different classes of "Humans"

-Ability to unlock parts to customize your Human™

-Different sports

-Destructible limbs or parts

-Weapons for the lil guys

Overall, I would definitely recommend this game to anybody who loves local co-op games.

Worth the \$5

10/10. a little buggy, but tons of fun. Itll soon have workshop and addons soon.. This is great!

Having a lot of fun trying not to do something stupid and there by kill myself... \*cough cough\* water spikes \*cough\*

Definitely worth the price already

This is the "Cube"-game I've wanted for a long time.

Luv it. Fun puzzle game for a bill. Level difficulty does not scale as progressively as I would like, some later levels are CONSIDERABLY simpler than predecessor levels. The game mechanics lend themselves to more puzzles though, I think the developers could add many more levels without any additional mechanics. For the price, I think DLC is appropriate for more levels though. You pay less than two cents per level with this base release.

All in all, happy with my purchase.

. Bought the game.

Got half naked girls.

Can't say I'm not satisfied

11/10. Just pure gold. OST in flac format.
