OMG It helps me i play heroes and generals on low fps and now 0_0 its have big fps oh i forget look at fps xD
. EDIT 12\07\2015:

So today I was excited to begin a full championship season with Williams.

I selected the Championship mode, selected Legend difficulty.
Like every other F1 game, I wanted to do a 25% race, with full qualifying.
Well in F1 2015 you can't. If you want full qualifying, you have to do a 100% race.
WHY? Why can I choose my qualy length in a single race, but not in a championship mode?
Eventually I concede to doing one-shot qualy, not the end of the world.

I land in the pits in Australia - the frame rate has gone to\u2665\u2665\u2665\u2665\u2665 I exited the pit lane to a 10FPS mess.
I ran a race around Silverstone on high settings at excellent frame rates yesterday, what is going on?
I turned the graphics settings to low and restarted, frame rate was back to 60 FPS, but it looked horrid. Increased to medium settings - back to 10 FPS.

I am done.
I am requesting my refund. As you can see from my initial review below, I was willing to give the game a chance.
This is unacceptable, I will not be buying a Codemasters game again.

I will be playing the F1 mod on Assetto Corsa if anyone needs me.

After the disapointment of F1 2014, I expected much better this time around. CM had a lot of extra time to get this right, given how little focus was given to F1 2014

I am running the game on an i5 4690k, R9 280x and from and SDD, haven't had any performance issues or crashes yet.

The FFB on my G27 is average, not much feeling in low speed corners, but after 20 laps of Silverstone I am OK with it. Physics are what I expected from a CM F1 game more or less.

The graphics are very disappointing, PC looks worse than the gameplay videos on youtube for PS4 and XB1. There is a weird blur on everything, nothing looks sharp.

Sound is poor, isnt well mixed.

I am going to keep the game, there is a solid base to be built on, hopefully CM patch it quick.

This seems to be a rushed PC port. I am giving thumbs down until these issues have been resolved.
Can't say I would recommend the game, but my experience is definitely not as bad as others.. Hey this game looks interesting but the terrible input mapping killed it for me. Oh and the 1st level music is annoying.

Will change this review if controller support gets better, but as of now it's like a minigame trying to get it to work.. Having finally earned my pilots license and obtaining a job crop dusting a marijuana field for the lovely black men just out of town, I was swiftly shipped back to the glorious fatherland to fly my new messerschmitt. Thinking I would serve my wonderul fuhrer I was shot down 3 minutes after taking off. I am writing this review from a prison in denmark. send help please.

Diary date 9/4/12. Give it a try. And get hooked. Excellent filler up. Best match-3 experience for me besides puzzlequest. And believe me, you need those extra power ups from your city. There 's no constant ideal mix of weapons, magic and soldiers. You need to adapt your inventory for the different challenges. Good game, great fun. Nobody pays me to write this.. I really like games like these, but the story (and especially the main character) is obnoxious. Littered with bad decisions to keep the plot

(and non-existent suspense) going.. Nice puzzle set.

If you are a fan of Ducati and or music buy Lacuna Coil by this when it is on sale.

The bikes look nice enough and the tracks are interesting. It just starts to feel the same after a few races.

I barely have a bike for 2 races before I'm onto the next bike, so I don't form any attachment. The bikes themselves don't have any upgrades.

I finished the Class C championship before writing this review.

TIP: You will need to run the exe in compatibility mode on most modern PCs. So far, so good... Feels more stiff and disjointed than Vol. 3, but a smoother experience than the first two. Good visuals, good audio. Passenger AI can be a bit...Wonky on the platform. And every train I've passed has been empty. But the driving experience is mostly good and the game is, for me at least, fun. Never have I had to race a train to beat a tunnel collapse before.. cool good-lookin game. so sad - it is dead now. Absolutely horrible. Janky controlles, 0 story, lame puzzels, and no perril what so ever. Its never explained why you are where you are (or even where for that matter) what your doing, what your goal is, who you are. There is not a single line of dialoge. Even then the monsters are the same and easy to kill, the puzzels are elementary and have no purpose. The only possitive point is that one of the (2) monsters is kinda gross and thats just because it has a messed up face. To be fair I played through one level, but there are 6 levels in the game (look at achievements) and the first one wasnt even a good waste of time. Not even worth 50 cents.. funny this should be free. Lovely music. Takes a little too long to stretch its wings with some alternate rules, but the puzzels are logical, stylish, and fun. Would recommend, and would encourage the devs to add some DLC puzzels that take additional advantage of the later rules. :). This may be one of the worst games ive ever played and its a disgrace to both flying and rail shooters. dont buy it.. This is a great example of storytelling in VR. I didn't want it to end, but I certainly didn't expect it to only last 10 minutes. A must get VR experience, especially to show your friends, but wait for a price drop.
